1. The MER shown above is included in the daily unit price. A discount based on the size of the group plan is applied to this fee and credited monthly to the member's account.

Rates of return over a period of one year or more correspond to historical annualized interest rates. Rates of return over a period of less than one year are not annualized. All rates of return are calculated after taking into account management costs and expenses charged to the fund. Prior performance is no guarantee of future performance. The MER shown is the MER reported as of December 31, 2024. Please consult the Fund Facts document for more information on individual funds.

Risk levels are determined in accordance with CSA guidelines using the standard deviation of fund returns over a three-year period, based on data from Lipper, an LSEG Company, as of December 31, 2025. For funds with less than three years of performance history, risk ratings are estimated using proxy data and input from fund managers. Risk levels may change over time and are not indicative of future performance.

Source of data: Lipper, an LSEG Company.
